The diagram shows a cross-section of a road profile. The existing ground is shown as a solid line, and the proposed road profile is shown as a dashed line. A drainage ditch is located in the center of the road. The scale bar indicates a horizontal distance of 90.00 and a vertical distance of 1.100. The profile is divided into several sections with specific elevations and distances.

Technical drawing showing a terrain profile and a cross-section of a road. The profile is defined by a dashed line (existing terrain) and a solid line (proposed terrain). The cross-section shows a road with a central dashed line, sidewalks, and a road surface. The drawing includes a scale bar (0.00 to 1.00) and a north arrow.

Technical drawing showing a terrain profile and a cross-section of a road. The profile view at the top shows the existing terrain (solid line) and the proposed road (dashed line). The cross-section below shows the road width, side slopes, and the proposed road grade (dashed line). The table below the drawing provides data for the terrain and the proposed project.
