1. Specifications vary depending on model.  
2. 64-bit software is required to enjoy the advantages of 64-bit processing.  
3. A 64-bit operating system is required to enjoy the ultimate performance of 4 GB or higher memory.  
4. Memory speed may vary, depending on the CPU, chipset or memory fitted.  
5. 1 GB is 1 billion bytes. Actual formatted capacity is less and may vary depending on preloaded materials and operating environment. Recovery Management uses a portion of the stated hard disk capacity as dedicated backup space.  
6. Actual throughput may vary depending on network conditions and environmental factors such as network traffic or overhead, building construction and access point settings.  
7. Bundled software may vary depending on hardware configuration, OS and regional availability.  
8. Trial periods vary depending on the operating system language, geographic region and specifications: 365-day trial for China, Taiwan, Hong Kong and Singapore (Simplified Chinese and Traditional Chinese models); 60-day trial for other regions.

In a continuing effort to improve the quality of our products, information in this document is subject to change without notice. Images shown are only representations of some of the configurations available for this model. Availability may vary depending on region. As a phenomenon known to thin-film transistors (TFTs), liquid crystal displays (LCDs) commonly exhibit a small number of discoloration dots, as so-called "non-conforming pixels." This phenomenon is a limitation of TFT LCD technology, not a product defect, and as such is not covered by Acer's warranty.
